DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 13-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nakazato et al. (JP 1 1-54680).

Nakazato discloses a heat sink comprising one or more heat pipes connected to a base member; a plurality of thermal plates connected to the one or more heat pipes at predefined intervals; an opening fashioned in each one of the plurality of thermal plates; wherein the opening allows airflow through each one of the plurality of thermal plates in a direction perpendicular to the plurality of thermal plates.

Nakazato's invention discloses all of the claimed limitations from above except for a fan mounted in relation to the heat sink. It would have been very obvious to one of ordinary skill in the art at the time of the invention to have a fan mounted in relation to the heat sink.

Doing so would provide an efficient means of circulating airflow.

Allowable Subject Matter

3. Claims 1, 2, 4, 5, 7-9, 11 and 12 are allowed.
